

Applicant: David A. Browdie Serial No.: 09/227,400 Group Art Unit: 1653

6. (Amended) The tissue adhesive of claim [1] 40 wherein the cross-linking agent comprises glutaraldehyde and a member selected from the group consisting of amino acids, polypeptides and proteins.

Ay

8. (Amended) The tissue adhesive of claim [1] 40 wherein the ratio of ultrasonically treated fibrous protein to ultrasonically treated globular protein is approximately 1:1.

- 11. (Amended) The tissue adhesive of claim [1] Which develops a cohesive strength of at least 5 kg/cm² and an adhesive bonding strength of at least 1 kg/cm² within five minutes post application.
- 12. (Amended) The tissue adhesive of claim [1] 42 further comprising approximately 0.01% methylene blue.

OCT 2 0 2000

Please add new claim 40 as follows:

OFFICE OF PETITIONS

A tissue adhesive for controlling vigorously bleeding tissues comprising:

- at least one fibrous protein;
- at least one globular protein; and
- at least one cross-linking agent; wherein
- said at least one fibrous protein and said at least one globular protein are ultrasonically treated prior to application to a mammalian tissue in need thereof.
